PB 125 Ex manual push button

SIL2 compliant as IEC 61508 & IEC 61511

The flameproof PB125 manual push button is ATEX / IECEx certified for use in potentially explosive atmospheres. It can be used it can activate alarms to alert personnel to potential dangers, help signal the need for immediate action in emergency situations and more. It is made from 316L Stainless Steel. Optional SIL2 IEC61508 certification.

ATEX / IECEx / UKEX Certification: ATEX Zone 1 and Zone 2 Certified for group IIC gas / vapour and Zone 21 and Zone 22 compliant for dust / powder applications. SIL2 compliant as IEC 61508 & IEC 61511.

Application: : Oil and gas, chemical, petrochemical, pharmaceutical, marine and offshore applications

Key features: Robust and highly reliable, this Ex manual push button is designed for corrosive environments and hazardous areas. Housing is made of stainless steel 316L covered with UV resistant paint. These ATEX / IECEx / UKEX compliant manual push buttons are compatible with PLC, ESD and DCS systems.

Options: There are two versions, a push button and push button with key Reset. The visualisation functions, line detection and lift flap protection are optional.

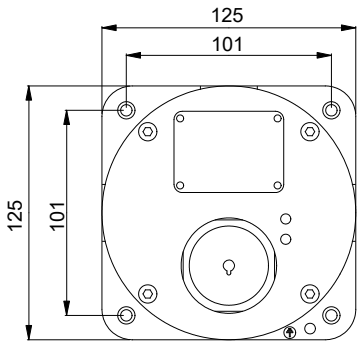

A range of accessories is available to customise this ATEX / IECEx / UKEX manual push button. These include pipe mounting brackets, sunshades, tag and duty labels and other accessories.
